

AMIGO TAKES CARE OF YOU.

"I know that we aren't your only client yet the attentiveness that we receive from the entire Amigo staff certainly makes us feel otherwise."

-Santiago Martin, Jr.

GROW YOUR BUSINESS— WE'LL HANDLE THE REST

Maintaining a healthy IT infrastructure can be a competitive advantage. Get the flexibility you need to adapt to business fluctuations by allowing AMIGO to:

Quickly and easily make changes to your equipment and usage on a monthly basis.

Handle Seasonal traffic volumes without costly equipment outlays.

A PROACTIVE APPROACH TO MANAGED IT SERVICES

"As the managed service provider market matures, CIOs should resist the urge to go with the lowest cost provider in favor of partners that understand your business and can help you achieve your strategic goals."

-CIO Magazine 6/30/17

Fully Managed Voice & Data Solutions

WE MAKE IT WORK FOR YOU.

For any organization in any industry, AMIGO has the expertise to most effectively and securely manage your IT and let you focus on your business.

HOW IS AMIGO DIFFERENT?

MAXIMIZING YOUR INVESTMENT

Technologists don't always look at IT from a business standpoint. They may not have the skills or the time to map out budgets and expenditures.

Business leaders don't always look at the technical side of IT and inherently know how their dollars should be spent.

It can be difficult to construct an IT plan and budget that technologists and business leaders can agree upon. That's where we fit into the equation. We don't hire sales people to lead and advise our clients. With AMIGO, we have specialized teams that steer your important technology decisions.

A MODERN APPROACH

Your unique business requires a technology plan that's aligned with your business – not a cookie-cutter one size fits all approach. AMIGO'S onboarding and business process review includes:

1. An in-depth view of your business, people and culture;
2. Ongoing Best Practices Benchmarking: Scoring your Business IT against industry standards;
3. Identification of Technology Risks and defining the business impact;
4. Focus on sequencing high priorities that solve business risks;
5. Prioritization of IT initiatives that support your business initiatives.
